PREFACE

Locating and selecting the right agricultural software for on-farm or institutional use continues to be a difficult and occasionally frustrating task. This publication lists agricultural software available from software manufacturers in Alberta, and across Canada and the United States to help facilitate the location process.

This is the third printing of the Agricultural Software Directory. Several software listings have been added to and others dropped from the original software listing. Changes have also been made to correct errors and omissions found in the previous publications.

The information for the first printing of the Directory was compiled by Debbie Meding, research assistant for Alberta Agriculture under the Priority Employment Program (PEP), during the winter of 1984 - 1985. Paul Gervais and Bruce Waldie, management technology unit, developed the information management computer system and prepared the publication for printing. The information for this printing of the Directory was compiled and prepared by Beth Lausen of the management technology unit.

Acknowledgement is given to the many software manufacturers who participated in this study. Without their cooperation, this study would not have been possible. Special thanks to the many software manufacturers who responded to our request for additional information to update the original publication. It is only through responses like these that this publication's accuracy can be maintained.

It should be noted that some information for some software listings was not available at the time of compilation. This is indicated by a 0 under the category for which the information was not available. Often manufacturers offer combinations of features and optimal enhancements; this is reflected in the range of prices listed.

Please note that the agricultural software industry is in a constant state of change; consequently, the data contained in this publication is also subject to change. More detailed and current information should be obtained directly from the software manufacturers (refer to listing at the back of this publication).

Your comments, suggestions and corrections are most welcome. Please forward any correspondence to Beth Lausen, Farm Business Management Branch, Box 2000, Olds, AB, T0M 1P0, or phone (403)556-4240 (RITE 154-1240).

HOW TO USE THIS PUBLICATION

This publication comprises four tables: They are:

TABLE 1: Software category codes
TABLE 2: Software listing sorted by category, product name, manufacturer
TABLE 3: Manufacturer listing
TABLE 4: Canadian province and US state codes

STEP ONE:

Refer to Table 1 - Software category codes. Identify the category code for your area of interest. For example, Nutrition/Ration/Fertilizer Analysis software is listed under category code 300. Further, if you are specifically interested in Least Cost Ration Formulation software, you will find it listed under category 307.

STEP TWO:

Refer to Table 2 - Software listing, sorted by category, product name and manufacturer. Arranged from left to right, we see the category code, computer hardware code, product name/manufacturer, a brief description of what the software does, and some technical information including RAM memory, disk drive and printer requirements.

The listing on the bottom of each page in Table 2 lists the computer hardware that corresponds to each code letter.

STEP THREE:

If you wish to contact the software manufacturer of any software products found in Table 2, simply note the manufacturer's name and refer to Table 3, Manufacturer Listing. This Table lists all the software manufacturers in alphabetical order, and includes a mailing address, and telephone number for each manufacturer.
